

Rudley – e-pick
Electric Guitar Pick

Features and Uses:

- 1) Used to independently amplify the sound of the pick separate from the guitar sound.
- 2) Can be used in recordings to record the pick sound separate from the guitar sound.
- 3) Can be used to capture the guitar rhythm in automated rhythm capture recording programs. Drums can be substituted for the e-pick sound. Thereby, providing a way to capture rhythms to match your guitar strumming.
- 4) Can be used to trigger events for guitar pedal effects.
- 5) Can be used as a stand-alone musical instrument to capture rhythms.
- 6) Guitar pedal effects can be applied to the e-pick to get various sounds.
- 7) No battery power required.

¼" Mono-Plug – Fits into any Guitar Amplifier

Thin and Flexible cord to get a good grip.

Rough silicon finish to get a good grip.
